

## TREE NUT CROPS

HOW TREE NUT CROP GROWERS CAN  
BENEFIT FROM FEEDING SOIL MICROBES

Healthy soil is vital to grow a healthy crop of tree nut crops.

PhycoTerra® soil microbe food invigorates growth of beneficial soil microbes required for optimum soil health.

The vital interaction between beneficial soil microbes and the nutrients available in soil increases the availability of nutrients for crops.

Watch plants respond with improved crop establishment, greater crop uniformity, improved resiliency under stress situations, improved crop quality and yield

### PHYCOTERRA® RECOMMENDATION FOR TREE NUT CROPS

Apply PhycoTerra® within or near the root zone at planting to maximize the benefit for the crop.

PhycoTerra® can be tank mixed with standard fertilizers or crop protection products.

It's always best to conduct a jar test with all your tank mix ingredients prior to mixing an entire load.

Shake containers and mix totes well prior to use. In finished tank solutions, maintain constant hydraulic or paddle agitation.

### APPLICATION RATES & TIMINGS

- Post-Harvest Application: 3 qts/acre by drip or micro-sprinkler fertigation
- Full Bloom: 3 qts/acre by drip or micro-sprinkler fertigation
- 30-days post bloom: 3 qts/acre by drip or micro-sprinkler fertigation monthly for two addition applications

**PhycoTerra® is compatible with CAN17 when applied within 24 hours of blending. We highly recommend the application PhycoTerra® whenever CAN17 is used.**
