

PhycoTerra® FX

A GROUND-BREAKING MICROALGAL FOLIAR TREATMENT THAT DELIVERS A SUPERIOR FOOD SOURCE TO YOUR CROP'S PHYLLOSPHERE

The phyllosphere plays a vital role as the frontline defense against environmental stressors, essential for sustaining processes like photosynthesis, biomass production, and reproduction within plants. Despite its significance, the leaf's surface presents challenges such as limited food sources and harsh conditions that impede the survival of essential microbes. **PhycoTerra®FX**, is a solution designed to feed and activate this unique foliar microbial community.

FEATURES

Delivers a superior food source to feed the unique leaf microbiome.

Innovative, proprietary formula maximizes ease-of-use and input compatibility.

BENEFITS

- Improves yield and ROI
- Increases abundance and diversity of phyllosphere with an inert microalgae food
- Delivers key food source to leaf microbes that provide abiotic stress relief
- Creates unique-mode-of-action with proven on-farm results

- Applied foliar at low rates
- Compatible with other crop inputs, including herbicides and fungicides
- Stable with an exceptional shelf life

Available in 2.5 gallon jugs (two jugs per case) and 250 gallon totes.

APPLICATION TIMING & USES

In-Season Applications:

Apply at typical foliar nutrient and crop protection timings. Application can be made via foliar spray, or other methods which effectively apply PhycoTerra®FX to the leaf.

CROPS	RECOMMENDED RATES
Corn, Cereal, Grains, Canola	8 oz / acre
Cotton	8 - 32 oz / acre
Soybeans	8 oz / acre
Specialty	16 - 32 oz / acre
